DETAILED ACTION

Specification

The abstract of the disclosure is objected to because the reference to "Figure 2" does not belong on the Abstract page. Correction is required. See MPEP § 608.01(b).

Claim Objections

Claims 3-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claims should refer to other claims in the alternative only, and/or, cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Becker (6,297,482) or Becker et al (6,501,053). Becker or Becker et al discloses a glass-ceramic plate 15 having at least one opening having a complex shape 36 that serves as a grill for a suction hood for the extraction of cooking gases.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shaver (6,575,157), Becker et al (2002/0014482), Pickering (2004/0261779), and Becker (D444, 024) disclose glass-ceramic cook top having

openings forming a grill for a suction hood. Hurley et al (6,349,714), Owens et al (6,293,276), Beach (5,213,091), and Beach et al (5,209,217) disclose a glass=ceramic cook top having an opening that as a design choice would have a one dimension greater than 10 cm. Vilato et al (EP 0879797 A1 or 6,120,282) discloses the manufacturing of a glass-ceramic cook top.
